DETAILED ACTION

1. Claims 1-33 have been examined. Application 09/965,152 (SERVICE DISCOVERY IN A NETWORK OF AUTOMATIC PRODUCT/SERVICE DISPENSING MACHINES) has a filing date 09/27/2001.

Election/Restrictions

2. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-8, 12-19 and 23-30 drawn to providing a user an alternative redemption product, classified in class 705, subclass 14.
 - II. Claims 9-11, 20-23 and 31-33 are drawn to detecting the presence of an electronic system, classified in class 455, subclass 67.12.

The inventions are distinct, each from the other because of the following reasons: Inventions I-II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention I has separate utility such as providing a user with an alternative redemption product without the need of detecting the presence of a processing system as in invention II.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include (i) an election of an invention to be examined even though the requirement be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention may be made with or without traverse. To reserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Should applicant traverse on the ground that the inventions are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the inventions or species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C.103(a) of the other invention.
